PROJECTS

Stock Prediction Model (LSTM)

Deep learning model predicting stock price trends from historical data

- Built an LSTM neural network for time-series stock price forecasting

Asset Management System (Full-Stack)

Enterprise web application for managing organizational assets, inventory, maintenance, and lifecycle tracking.

- Developed the application using **FastAPI**, implementing secure authentication, role-based access control, asset tracking, inventory management, and RESTful APIs.
- Built modules for asset allocation, maintenance history, category management, reporting, and dashboard analytics with a relational database backend.

CRM System (Full-Stack)

- Customer Relationship Management (CRM) platform for managing customers, leads, sales, tasks, and business operations.
- Built the application using **FastAPI**, implementing secure authentication, role-based access control, REST APIs, and CRUD operations for customer, lead, and sales management.
- Developed modules for customer management, lead tracking, task assignment, reporting, and dashboard analytics with a relational database backend.

CERTIFICATIONS

- Basic Python Certificate
- Claude with the Anthropic API

KEY ACHIEVEMENTS

- Published a research paper on Stock Prediction using LSTM in JETIR — demonstrating applied AI research capability
- Filed copyright protection for a JavaScript-based Game Development Library.
