

Uditya Patel

Software Developer | Full-Stack & AI Solutions

Indore, Madhya Pradesh | +91 81092 72488 | pateluditya2004@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Software Developer with a strong foundation in computer science and hands-on experience in full-stack development and AI-driven solutions. Built a deep learning LSTM-based Stock Prediction Model with a published research paper, and developed a modular JavaScript 2D game library (copyright filed). Proficient in Python, Java, JavaScript, HTML, CSS, and Flask. Passionate about innovative problem-solving, continuous learning, and delivering impactful solutions in collaborative environments.

EDUCATION

B.Tech – Computer Science & Engineering	July 2023 – Present
SAGE University, Indore, Madhya Pradesh	
Senior Secondary (12th)	July 2023
Jaison's Academy Higher Secondary School, Indore, Madhya Pradesh	
Higher Secondary (10th)	May 2021
Jawahar Navodaya Vidyalaya, Indore, Madhya Pradesh	

TECHNICAL SKILLS

Programming Languages: Python · Java · JavaScript · C

Web & Frameworks: HTML · CSS · Flask · REST APIs

AI / ML: Deep Learning · LSTM Networks · NEAT Algorithm · TensorFlow / Keras

Tools & Libraries: Pygame · HTML5 Canvas · Git · GitHub · VS Code

Core Concepts: Data Structures & Algorithms · Full-Stack Development · Neural Networks

PROJECTS

Stock Prediction Model (LSTM)

Deep learning model predicting stock price trends from historical data

- Built an LSTM neural network for time-series stock price forecasting
- Demonstrates strong grasp of sequence modelling and data preprocessing
- GitHub: github.com/Itzudii/stock-pridiction-model

AI Game Player – Flappy Bird (NEAT)

Autonomous AI agent trained via neuroevolution to play Flappy Bird

- Implemented the NEAT (NeuroEvolution of Augmenting Topologies) algorithm
- Neural network evolves autonomously over generations without pre-defined rules
- GitHub: github.com/Itzudii/FlappyBirdBot-NEAT

JS-Based Game Development Library

Lightweight, modular JavaScript library for 2D game development | Copyright filed (under review)

- Built on HTML5 Canvas with features: sprite rendering, collision detection, animation, input control, and game loop
- Designed for developer ease-of-use and extensibility
- GitHub: github.com/Itzudii/JSnake-Lib (private)

Car Rental Website (Full-Stack)

Full-stack web application with user authentication and real-time booking

- Built with Flask (backend) + HTML/CSS/JavaScript (frontend)
- Features: dynamic vehicle listings, user login/signup, and booking management
- GitHub: github.com/Itzudii/Car-Rental-Website-Flask-python

Cortex-FileManager

AI-enhanced file indexing and semantic search engine powered by local LLMs.

- Utilized System architecture Knowledge
- GitHub: github.com/Itzudii/CortexFS

CERTIFICATIONS

- Introduction to AI/ML
- Research Paper Publication – Stock Prediction using LSTM
- Basic Python Certificate
- Basic Java Certificate
- Industrial Requirements & Basic Programming in Python
- Claude with the Anthropic API
- Model Context Protocol: Advanced Topic – Explored
- Copyright ROC (JS Based Game Development Kit)-

KEY ACHIEVEMENTS

- Published a research paper on Stock Prediction using LSTM in JETIR — demonstrating applied AI research capability
- Filed for copyright protection on the JS-Based Game Development Library (currently under review)
- Achieved 5-star ratings on HackerRank for both Python and Java

EXTRA-CURRICULAR ACTIVITIES

Smart India Hackathon – National Level Participant

Collaborated in a team to ideate and propose a tech-based solution for a real-world problem statement under time

PERSONAL DETAILS

Languages: Hindi (Proficient) · English (Advanced)
Location: Indore, Madhya Pradesh, India
